

English, 2010 EC, entrance exam

Grade 12 · English · 2010 E.C.

Time allowed: 120 minutes

Questions: 100

Total marks: 100

Name _____ Grade _____ ID No. _____ Date _____

1. It to wanted you today me do. (1)
 - A. you wanted me to do it today.
 - B. today you wanted it me to do.
 - C. it wanted me today you to do.
 - D. me wanted you to do it today.
2. In got has house all money new the her she. (1)
 - A. she has got her money all in the new house.
 - B. she has all here new money got in the house.
 - C. she has got all her money in the new house.
 - D. All her money she has got in the new house.
3. Planet could no our how that have beyond implications understanding life go far started Earth. (1)
 - A. understanding how life started on Earth could have implications that go far beyond our planet.
 - B. how life started on our Earth could have implications beyond planet that go far.
 - C. Earth could have understanding implications that go far beyond planet that go far.
 - D. our planet could have implications how life go far started beyond that understanding on Earth.
4. Lung pollution is causes why air obvious cancer. (1)
 - A. why lung cancer causes air pollution is obvious.
 - B. why air pollution causes lung cancer is obvious.
 - C. lung cancer causes why air pollution is obvious.
 - D. why causes lung cancer air pollution is obvious.
5. a. in 1991, the country launched an early- warning system- the first in the world and one that has been emulated by countries like Japan. b. mexico's recent quake occurred 32 years after the city's 1985 shock, which killed about 10,000 people and destroyed 3,000 buildings. c. since then, mexico has worked to shore up its earthquake preparedness. d. some had a minute to duck and cover, to grab go bags, to locate their loved ones. e. thanks to sirens and smart phones, thousands of individuals were alerted to the impending quake f. those seconds can mean the difference between life and death." (1)
 - A. a e b c f d
 - B. b c a e d f
 - C. c a b d f e
 - D. f a e b d c
6. a. I knew the journey could be tough but not as bitter. b. something more unbearable! My visa application was denied. c. I migrated to Egypt in December 2005 dreaming to travel to Australia. d. in fact, you have to experience it yourself to see how severe things could be. e. the weather was indescribably harsh and the police were brutally unfriendly." (1)
 - A. c a b e d
 - B. c e d b a
 - C. c e a b d
 - D. d e c a b

- 7.** a. it is about cultivating one's mind. b. I believe in the power of education c. I migrated to Egypt in December 2005 dreaming to travel to Australia. d. in fact, you have to experience it yourself to see how severe things could be. e. the weather was indescribably harsh and the police were brutally unfriendly."
- A.** b d e c a **B.** d a e c a
- C.** b a e d c **D.** c a e d b

8. *Passage 1 The Shrinking Earth: Ecological Threats* 1. In 1977, the Food and Agriculture Organization (FAO) and UNESCO jointly published an alarming map of the spread of deserts across the world. Shaded in orange, pink and red were all the areas in danger of desertification. The coloured patches a major part of the developing world outside the rainy equatorial belt. In Latin America they covered north east Brazil, central and northern Mexico and stretched right down the Andes as far as Chili. They ate in to the Horn of Africa and much of the south west of the continent. And without interruption they reached half way round the globe in a broad swath from the Atlantic coast of the Sahara, right across North Africa and the Sahel, through the Middle East and Persia to Pakistan and north west India. 2. There could be no more graphic expression of the ecological dangers that threaten so much food production, so many livelihoods in the developing countries. The world is losing precious agriculture land at twice the rate that new land is being broken for farming. An area greater than great Britain is disappearing every year. Soil is being exhausted, eroded, and blown away at the rate of two and a half billion tons per year. By the end of the century, the world may have to support one and a half times its present population on only three quarters of its present cultivated area. 3. In this report on the state of the environment in 1977, United Nations Environment Programme Director, Mostafa Tolba, warned that, if present trends continue, there would be only 0.15 hectares of farm land per person by the year 2000, half the 1975 level. Productivity would have to double merely to allow people to get the same amount of food as today, these are the figures on which he based that cultivation: in 1975 there were 1240 million hectares under cultivation. Over the next 25 years, perhaps another 300 million new hectares may be opened up but over the same period 600 million hectares half the entire 1975 cultivated area may be lost of these, half will probably disappear under the ink - blot spread of cities, which are expanding horizontally twice as fast as the populations are growing and over some of the best agriculture land. The other 300 million will be the toll of soil degradation. 4. At least half of the total erosion will be in the world's 45 million square kilometres of potentially productive but ecologically precarious dry lands, which stretch through a hundred nations. About 700 million people live in this zone, almost all of them in developing countries, and 18 million live in areas that are currently undergoing rapid desertification. 5. Everywhere the deserts are advancing. In Sudan, the southern edge of the Sahara moved south by 100 kms between 1958 and 1957. The deserts do not march forward on a solid front, like an army. Patches appear, like those at Aorema in Burkina Faso, around centers of population or watering holes, then spread, link up with others, and finally merge into the desert itself. 6. The chief agent of what has been called leprosy of the soil is man, the impart of his activates on highly sensitive and delicately balanced ecosystems. The prime factor in the process is population increase. The number of people in the Sahel, for example, is doubling every 25 to 30 years. We can see everywhere the consequences of this among settled farmers: the cutting down of fallow periods, progressive decline in the vegetation cover, increasing erosion. As population goes on growing cultivation is pushed into areas that are entirely unsuitable for agriculture, and there the process progresses even more rapidly. Taken from *English four*, ETC, department of English
- Which paragraph could be cited as a good example to show that the continent of Africa has been seriously affected by desertification?
- A. paragraph 1
B. paragraph 5
C. paragraph 4
D. paragraph 6

9. *Passage 1 The Shrinking Earth: Ecological Threats* 1. In 1977, the Food and Agriculture Organization (FAO) and UNESCO jointly published an alarming map of the spread of deserts across the world. Shaded in orange, pink and red were all the areas in danger of desertification. The coloured patches a major part of the developing world outside the rainy equatorial belt. In Latin America they covered north east Brazil, central and northern Mexico and stretched right down the Andes as far as Chili. They ate in to the Horn of Africa and much of the south west of the continent. And without interruption they reached half way round the globe in a broad swath from the Atlantic coast of the Sahara, right across North Africa and the Sahel, through the Middle East and Persia to Pakistan and north west India. 2. There could be no more graphic expression of the ecological dangers that threaten so much food production, so many livelihoods in the developing countries. The world is losing precious agriculture land at twice the rate that new land is being broken for farming. An area greater than great Britain is disappearing every year. Soil is being exhausted, eroded, and blown away at the rate of two and a half billion tons per year. By the end of the century, the world may have to support one and a half times its present population on only three quarters of its present cultivated area. 3. In this report on the state of the environment in 1977, United Nations Environment Programme Director, Mostafa Tolba, warned that, if present trends continue, there would be only 0.15 hectares of farm land per person by the year 2000, half the 1975 level. Productivity would have to double merely to allow people to get the same amount of food as today, these are the figures on which he based that cultivation: in 1975 there were 1240 million hectares under cultivation. Over the next 25 years, perhaps another 300 million new hectares may be opened up but over the same period 600 million hectares half the entire 1975 cultivated area may be lost of these, half will probably disappear under the ink - blot spread of cities, which are expanding horizontally twice as fast as the populations are growing and over some of the best agriculture land. We can see everywhere the consequences of this among settled farmers: the cutting down of fallow periods, progressive decline in the vegetation cover, increasing erosion. As population goes on growing cultivation is pushed into areas that are entirely unsuitable for agriculture, and there the process progresses even more rapidly. Taken from *English four, ETC, department of English*
- Which one of the following sentences best summarizes paragraph 2?
- A. the world is losing its precious agricultural land at an alarming rate.
 - B. the amount of cultivable land is decreasing while population remains constant.
 - C. soil degradation is a serious problem threatening people in developing countries
 - D. the amount of cultivable land population growth are inversely proportional.

What does the phrase, the ink blot spread of cities (paragraph 3) mean?

- A. spread of cities along the main roads.
- B. establishment of a city to be followed by another in short distance
- C. establishment of mega cities on farmlands
- D. establishment and spread of cities into the farmland

What is the main idea conveyed in paragraph 1

- A. deserts affected developing countries more than they did the developed ones.
- B. Africa has been more seriously affected by desert than Latin America.
- C. the areas outside the rainy equatorial belt have not been affected by deserts.
- D. FAO and UNESCO have shown a serious concern about desertification problems.

12. *Passage 2* 1. UNITED NATIONS - nearly 60 million people have been driven from their homes by war and persecution an unprecedented global exodus that has burdened fragile countries with waves of new comers and littered deserts and seas with the bodies of those who died trying to reach safety. The new figures, released recently by the United Nations refugee agency, paint a staggering picture of a world where new conflicts are erupting and old ones are refusing to subside, driving up the total number displaced people to a record 59.5 million by the end of 2014, the most recent year tallied. 2. Half of the displaced are children. Nearly 14 million people were newly displaced in 2014, according to the annual report by the office of the United Nations High Commissioner for Refugees to other words, tens of thousands of people were forced to leave their homes every day and seek protection elsewhere ""last year, the report found. Tens of millions of others fled in previous years and remain stuck, sometimes for decades, unable to go home or find a permanent new one, according to the refugee agency. The include the more than 2.5 million displaced is the Darfur region of Sudan, and the 1.5 million Afghans still living in Pakistan. 3. When refugees flee their own countries, most of them wind up in the worlds less developed nations, with Turkey, Iran and Pakistan hosting the largest numbers. One in for refugees now finds shelter in the world's poorest countries, with Ethiopia and Kenya taking many more refugees than, say Britain and France . As the report states. ""the global distribution of refugees remains heavily skewed away from wealthier nation and towards the less wealthy."" Even so, there has been a sharp backlash in European capitals against the waves of people coming across the Mediterranean Sea, including many who are fleeing conflict and repression in countries like Syria and Eritrea. For now, the European Union has shelved its plans to get approval from the United Nations Security Council to target human smugglers who operate in lawless Libya and to destroy the ships they use to bring migrants across the sea. Instead, the European Union is scheduled to meet on Monday to discuss whether it will start military operations in the international waters of the Mediterranean Sea, for which it does not need the council's blessings. 4. European Union leaders are still squabbling with one another over how to split up at least 40,000 asylum seekers across their 28 member states. And they have stepped up search and rescue operation after intense public pressure stemming from a sharp increase in the deaths of migrants crossing the Mediterranean this year. Australia has felt no such compaction. Its prime minister, Tony Abbott, has pledged to turn around migrate boats before they enter Australian territorial water, including those with minority Rohingyas fleeing persecution in Myanmar. His administration faces scrutiny over allegations that it paid smugglers to turn a boat back to Indonesia after it was intercepted on the high seas. 5. ""For an age of unprecedented mass displacement, we need an unprecedented humanitarian response and a renewed global commitment to tolerance and protection for people fleeing conflict an persecution."" Antonio Guterres, the high commissioner for refugees, said in a statement accompanying the annual report. "" 6. Amnesty international in a report issued this week, accused governments and smugglers alike of pursuing "" selfish political interest instead of showing basic human compassion. "" The United States offers permanent resettlement to roughly 70,000 refugees each year, though its plants too admit 2,000 Syrian refugees this year have drawn scrutiny from Republican lawmakers who worry that some among them might be terrorists. The war in Syria is the largest source of displacement. By the end of 2014, 7.6 million Syrians were displaced within the country itself, and nearly another 3.9 million were refugees living outside the war torn nation. Source: United National English Language Programme

(1)

Which of the following sentences reflects Antonio Guterres view towards refugees?"

- A. people are being persecuted at an unprecedented rate.
- B. the world should be more tolerant to those displaced from their homes.
- C. people who flee conflict and persecution need to be more tolerant.
- D. we need to be aware that there is an unprecedented humanitarian response today.

13. *Passage 2* 1. UNITED NATIONS - nearly 60 million people have been driven from their homes by war and persecution an unprecedented global exodus that has burdened fragile countries with waves of new comers and littered deserts and seas with the bodies of those who died trying to reach safety. The new figures, released recently by the United Nations refugee agency, paint a staggering picture of a world where new conflicts are erupting and old ones are refusing to subside, driving up the total number displaced people to a record 59.5 million by the end of 2014, the most recent year tallied. 2. His administration faces scrutiny over allegations that it paid smugglers to turn a boat back to Indonesia after it was intercepted on the high seas. 5. ""For an age of unprecedented mass displacement, we need an unprecedented humanitarian response and a renewed global commitment to tolerance and protection for people fleeing conflict an persecution."" Antonio Guterres, the high commissioner for refugees, said in a statement accompanying the annual report. "" 6. Amnesty international in a report issued this week, accused governments and smugglers alike of pursuing "" selfish political interest instead of showing basic human compassion. "" The United States offers permanent resettlement to roughly 70,000 refugees each year, though its plants too admit 2,000 Syrian refugees this year have drawn scrutiny from Republican lawmakers who worry that some among them might be terrorists. The war in Syria is the largest source of displacement. By the end of 2014, 7.6 million Syrians were displaced within the country itself, and nearly another 3.9 million were refugees living outside the war torn nation.
